Invoice Search Enhancement to Show Exceptions

Enhancement Details:

Problem	On the Invoices tab, the existing Basic Search was inefficient due to the large amount of data that was being returned.
Solution	Changed the name of the Basic Search to Exceptions.
Impact/Action	Modified the Invoice search page by replacing the Basic Search with Exceptions. This tab will now return only exceptions for the customer, resulting in faster load times and improved productivity when updating invoices to handle exceptions.

User and Contact Manager – Add Filters for Roles and Notifications

Enhancement Details:

Problem	It was difficult to determine which users were signed up for the different system-generated notifications.
Solution	Added the ability to filter users by their roles and any selected notifications.
Impact/Action	Will be able to better determine which users are signed up for notifications (for example, the import summary and exceptions).
